VdS Guidelines for Automatic Fire Detection and Fire Alarm Systems

Planning and Installation

Contains DIN VDE 0833-2 (VDE 0833 Part 2) : 2022-06 – Alarm Systems for fire, intrusion and hold-up, Part 2: Requirements for fire alarm systems.

Reproduced with the permission of

DIN German Institute for Standardisation e. V.

and the

VDE Verband der Elektrotechnik Elektronik Informationstechnik e. V.

The standard corresponds to the current status of the body of standards.

Reproduction – even for internal purposes – is not permitted.

The present guidelines for automatic fire detection and fire alarm systems, planning and installation, shall only have a binding character if its use has been agreed upon on a case-by-case basis; otherwise, taking these guidelines into consideration shall be without obligation. The agreement on the use of these guidelines for automatic fire detection and fire alarm systems, planning and installation, is purely optional. In particular cases, third parties may also accept other requirements at their discretion which do not correspond to these guidelines.

To avoid any distraction from the understanding of the text, VdS uses the generic masculine throughout. There is expressly no preference or other valuation implied of the male, female or other genders.

Content

Preface VdS 2095en	6
General information	6
Validity	6
Previous editions	6
1 Scope	7
2 Normative references	7
3 Terms and abbreviations	10
3.1 Terms and definitions	10
3.2 Abbreviations	16

4	Basic requirements for components of fire detection and fire alarm systems	17
4.1	General	17
4.2	Fire detectors	17
4.3	Monitored transmission paths	18
4.4	Control and indicating equipment (CIE)	18
4.5	Power supply	19
4.6	Signalling devices	19
5	Requirements for the triggering of fire protection systems.....	19
6	Rules for planning, projecting, installing and commissioning of fire detection and fire alarm systems	20
6.1	Principles	20
6.2	Planning	27
6.3	Alarming	54
6.4	Projecting	58
6.5	Design documentation	65
6.6	Installation	66
7	Commissioning	68
7.1	General	68
7.2	Verification	69
8	Initial Inspection.....	69
8.1	General	69
8.2	Testing requirements	69
8.3	Inspection protocol.....	69
8.4	Handover to the operator	69
8.5	Documentation	70
8.6	Installation certificate	70
9	Operation of fire detection and fire alarm systems	70
9.1	General	70
9.2	Log book	70
9.3	Repair work	70
9.4	Clear space around detectors.....	71
9.5	Exceptions from monitoring	71
9.6	Disconnection	71
9.7	Deceptive alarm prevention	71
9.8	Documentation.....	71
9.9	Changes and extensions	71
9.10	Maintenance	71
Annex A	(mandatory) Monitoring of rooms with electric and electronic equipment	72
A.1	General	72
A.2	Room monitoring.....	72
A.3	Local application monitoring	72
Annex B	(informative) Classification table for aspirating smoke detectors	75
Annex C	(informative) Classification of heat detectors and line-type heat detectors	76

Annex D	(mandatory) Standardised interface for extinguishing systems	77
D.1	Connection points	77
D.2	Transmission of signals, faults and additional information	78
D.3	Transmission of alarms from the fire detection and fire alarm system to the extinguishing system	78
D.4	Transmission of additional signals relevant to the function of the extinguishing system.....	78
D.5	Transmission of signals from the extinguishing system to the control and indicating equipment.....	79
D.6	Additionally requested transmission of fault signals from the extinguishing system to the control and indicating equipment	79
D.7	Additionally requested transmission of alarm signals from the extinguishing system to the control and indicating equipment	80
Annex E	(mandatory) Monitoring of rooms for data processing and similar systems.....	81
E.1	General	81
E.2	Monitoring areas	81
E.3	Detection zones	82
E.4	Choice of detector type.....	82
E.5	Number and arrangement of point smoke detectors or suction holes of aspirating smoke detectors.....	82
Annex F	(mandatory) Monitoring of high rack storage.....	83
F.1	General	83
F.2	Choice of fire detectors	83
F.3	Arrangement of smoke detectors.....	83
F.4	Detection zones	86
Annex G	(informative) Overview of types of line-type heat detectors according to DIN EN 54-22.....	88
Annex H	(informative) Alarming in facilities for persons in need of care or disabled persons who are not able to rescue themselves	89
Annex VA	(mandatory) Fire detection and fire alarm systems with increased requirements	91
Annex VB	(informative) Project planning of aspirating smoke detectors	92
Annex VC	(informative) Multi sensor detectors	96
VC.1	Point detectors with combined smoke and heat sensors	96
VC.2	Point detectors with combined CO and heat sensors.....	96
VC.3	Point detectors with combined smoke, CO and optional heat sensors	97
Bibliography		98
